bt-LogAnalyzer 6
## Web and Email Usage Reporting

Limit Legal Liabilities

Take a proactive approach to defending against lawsuits based on inappropriate content being viewed in the work place

Increase Bandwidth Efficiency

Identify where bandwidth is being used to determine if there is too much non-business browsing occurring or if you really do need additional bandwidth.

Increase Productivity

When users are aware that their digital footprint is being monitored, they are more inclined to stay focused on business usage rather than personal usage.
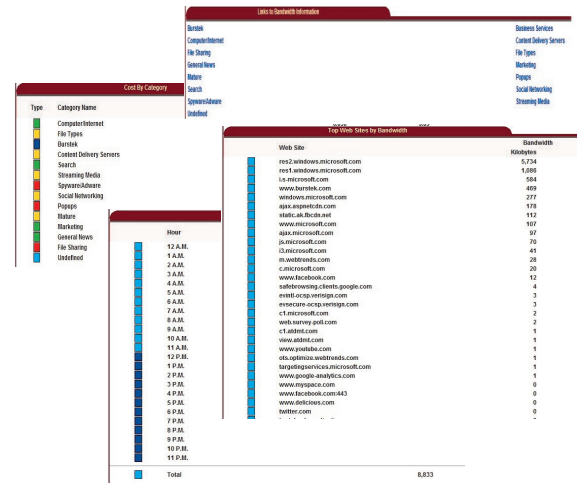

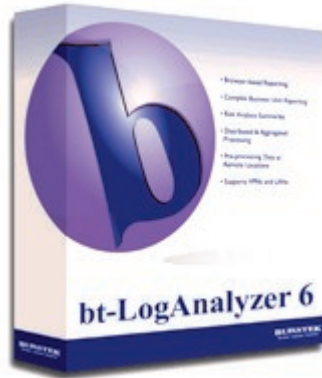

Example Report Sections

Overview

bt-LogAnalyzer reports on all outbound Web activity to generate categorized reports. This diagnostic business tool was designed to identify risks associated with your Internet security, employees, productivity, and network resources in time to take corrective action. Key features include Active Directory support; remote management; distributed report processing for multiple servers/multiple locations; reports by category, user, group or OU; scheduling for automatic report generation and delivery; ability to extract a single data file for a specific period and generate the desired report; scalability, flexibility and customization are all key components of bt-LogAnalyzer.

Key Benefits:

- Microsoft Management Console Based Reporting
- Single interface when using bt-WebFilter
- Ad-Hoc reporting capabilities
- Customizable URL database
- Active Directory Integration
- Daily Category List Definition updates
- Out of box support for many popular log files
- Distributed Reporting Functionality
- Extensive amount of built in reports
- Excellent Technical Support

bt-LogAnalyzer 6

How it Works

Read

Configure Log Source to read one of the following type of Log Files:

- Useful
- Vehicles
- Weapons
- Weather
- XXX-Sexual Content

Report

Generate the following canned reports:

Web Reports

- Bandwidth Cost Summary
- Enterprise Summary
- Management Summary
- Quota Usage
- Sexual Content Details
- Top Web Sites
- User Audit Details
- Web Extra
- Top 25 Users

Email Reports

- Exchange Email Details
- Global Top Users Email
- Top 25 Users
- Top Users – Inbound Email
- Top Users – Outbound Email
- Total Email Activity
- Total Email Volume

Report Output Options:

- **HTML**
- **XML**
- **EMAIL**

Create Custom Reports from the following sub reports

Global

- Number of Web Pages per Category
- Cost by Category
- Download Time by Category
- Risk Analysis
- Number Of Users Per Category
- Top Users Activity – Web Pages
- Top Users – Denied Activity
- Top Users – Category Activity
- Top Users – Category Volume
- Top Users – Volume
- Top Web Sites
- Top Web Sites by Bandwidth
- Web Access – Hourly Activity
- Web Access – Hourly Bandwidth
- Web Access – Results Summary
- Top Users – Volume Quota
- Top Users – Time Quota
- Top Users – Total Email Activity
- Top Users – Total Email Volume
- Top Users – Outbound Email Activity
- Top Users – Inbound Email Activity
- Top Users – Inbound Email Volume
- Top Outbound Email Addresses
- Top Inbound Email Addresses

User audit detail

- Number of Web Pages per Category
- Cost by Category
- Download Time by Category
- Risk Analysis
- Top Web Sites
- Top Web Sites by Bandwidth
- Web Access – Hourly Activity
- Web Access – Hourly Denied Activity
- Web Access – Hourly Bandwidth
- Web Access – Results Summary
- Web Page Details
- Top Users – Total Email Activity
- Top Users – Total Email Volume
- Top Users – Outbound Email Activity
- Top Users – Outbound Email Volume
- Top Users – Inbound Email Activity
- Top Users – Inbound Email Volume
- Top Outbound Email Addresses
- Top Inbound Email Addresses
- Email Details
